KSS School of Physician Associates

Physician Associates

A new Primary Care Workforce for Kent, Surrey and Sussex

Training Placement Information Event

HEE working across Kent Surrey and Sussex and the Universities in the region are co-partners in an exciting new programme to expand the role of **Physician Associates**.

In 2016 three local **Universities** each launched a 2 year Post-Graduate Diploma in **Physician Associate Studies**. The students are trained to work in **both primary and secondary care** via integral clinical training placements in GP, mental health and hospitals. Placements in **general practice** occur during **both years**.

You are invited to attend one of our **Information Events** to learn more about **PAs**, the **requirements for training placements**, **PA student supervision**, the **potential benefits** this new profession could bring to your organisation and how you can become **involved** in this exciting programme by hosting **training placements** for the cohort of students starting **September 2017**.

For details of an event in your area and to register your place, please contact:

Sharon Norton, HEKSS

Email: Sharon.Norton@hee.nhs.uk

Or, for general information about the programme, please contact:

Jo Piper, KSS School of PAs
